Technical Bulletin #193

Subject: Boreal Nature Elite as Below-Grade Frost Protection

Genyk Boreal Nature Elite is a closed cell polyurethane foam product that conforms to the CAN/ULC S705.1 Material Standard. As such, Boreal Nature Elite is a suitable product to install in below-grade applications. The product's high thermal resistance makes it ideal for frost protection. Further, the product's resistance to water absorption provides long term durability as demonstrated in NRC basement insulation study (available on the Genyk website).
